Consultancy for Flow Calibration/Test Laboratory

We provide consultancy for establishing flow calibration and test laboratory as per the requirement.

Consultancy for setting-up of flow meter calibration facility, domestic and bulk water meter test facility and control valve test facility as per Indian and International standards (ISO 4185, ISO 4064, IS 779/IS 6784, OIML R49) are provided.

Technical consultancy, including fabrication drawing, for establishment of flow calibration /test facility based on gravimetric and comparison method is offered based on the requirements.

We are dedicated to help manufacturers of flow meters and control valves in developing most advanced in-house calibration / test lab.

We deliver strategic designs as per the customer requirement and space availability to achieve optimum uncertainty in measurement.

Lab Accreditation as per ISO 17025:2017

We offer consultancy and documentation, as per laboratory's quality system, for obtaining accreditation for calibration and testing laboratories. We are expertise in providing consultancy for fluid flow calibration and testing laboratory and mechanical calibration laboratory.

Services

- Laboratory evaluation
- Development of management systems in compliance with ISO/IEC 17025
- Preparation of quality manual
- Preparation of Quality system procedures
- Assisting in making work instructions and all required documents
- Providing training for evaluation of measurement uncertainties and techniques
- Assistance to conduct Internal Audit
